

liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

2.15.2.2.2 Financial liabilities at amortised cost

After initial recognition, these are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included as finance costs in the statement of profit and loss.

2.15.2.3 Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms,

or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, shall be recognised in profit or loss.

2.15.2.4 Reclassification of financial assets

The Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Group's senior management determines change in the business model as a result of external or internal changes which are significant to the Group's operations. Such changes are evident to external parties. A change in the business model occurs when the Group either begins or ceases to perform an activity that is significant to its operations. If Group reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Group does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

The following table shows various reclassification and how they are accounted for

Original classification	Revised classification	Accounting treatment
Amortised cost	FVTPL	Fair value is measured at reclassification date. Difference between previous amortized cost and fair value is recognised in P&L.
FVTPL	Amortised Cost	Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.
Amortised cost	FVTOCI	Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.
FVTOCI	Amortised cost	Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost.
FVTPL	FVTOCI	Fair value at reclassification date becomes its new carrying amount. No other adjustment is required.
FVTOCI	FVTPL	Assets continue to be measured at fair value. Cumulative gain or loss previously recognized in OCI is reclassified to P&L at the reclassification date.

2.15.2.5 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.15.2.6 Fair value measurement of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions.

The Group categorizes assets and liabilities measured at fair value into one of three levels depending on the ability to observe inputs employed for such measurement:

- (a) **Level 1:** inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- (b) **Level 2:** inputs other than quoted prices included within level 1 that are observable either directly or indirectly for the asset or liability.
- (c) **Level 3:** inputs for the asset or liability which are not based on observable market data (unobservable inputs).

The Group has an established control framework with respect to the measurement of fair values. This includes a finance team that has overall responsibility for overseeing all significant fair value measurements who regularly review significant unobservable inputs, valuation adjustments and fair value hierarchy under which the valuation should be classified.

2.15.3 Cash and Cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

2.16. Borrowing Costs

Borrowing costs are expensed as and when incurred except where they are directly attributable to the acquisition, construction or production of qualifying assets i.e. the assets that necessarily takes substantial period of time to get ready for its intended use, in which case they are capitalised as part of the cost of related asset up to the date when the qualifying asset is ready for its intended use.

2.17 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax is the amount of income taxes payable (recoverable) in respect of the taxable profit (tax loss) for a period. Taxable profit differs from "profit before income tax" as reported in the statement of profit and loss and other comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary difference to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Unrecognised deferred tax assets are reassessed at the end of each reporting year and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the

manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities, and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

2.18 Employee Benefits

2.18.1 Short-term Benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service.

All short-term employee benefits are recognized in the period in which the services are rendered by employees.

2.18.2 Post-employment benefits and other long term employee benefits

2.18.2.1 Defined contributions plans

A defined contribution plan is a post-employment benefit plan under which the Group pays a fixed contribution into a fund maintained by a separate body and the Group will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in the statement of profit and loss in the periods during which services are rendered by employees.

2.18.2.2 Defined benefits plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Group's net obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in return of their service in the current and prior periods. The benefit is discounted to determine its present value and reduced by the fair value of plan assets, if any. The discount rate is based on the prevailing market yields of Indian Government securities as at the reporting date that have maturity dates approximating the terms of the Group's obligations and that are denominated in the same currency in which the benefits are expected to be

paid.

The application of actuarial valuation involves making assumptions about the discount rate, expected rates of return on assets, future salary increases, mortality rates etc. Due to the long-term nature of these plans, such estimates are subject to uncertainties. The calculation is performed at each balance sheet by an actuary using the projected unit credit method. When the calculation results in the benefit to the Group, the recognised asset is limited to the present value of the economic benefits available in the form of any future refunds from the plan or reduction in future contributions to the plan. An economic benefit is available to the Group if it is realisable during the life of the plan, or on settlement of plan liabilities.

Re-measurement of the net defined benefit liability, which comprises actuarial gain and losses considering the return on plan assets (excluding interest) and the effects of the assets ceiling (if any, excluding interest) are recognised immediately in the other comprehensive income. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit and loss.

When the benefits of the plan are improved, the portion of the increased benefit relating to past service by employees is recognised as an expense immediately in the statement of profit and loss.

2.18.3 Other long-term employee benefits

Other long-term employee benefits are all employee benefits other than short-term employee benefits, post-employment benefits and termination benefits.

Other long-term employee benefits include items which are not expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service.

For other long-term employee benefits, net total of the following amounts is recognized in the statement of profit or loss:

- (a) Service cost
- (b) Net interest on the net defined benefit liability (asset)
- (c) Re-measurements of the net defined benefit liability (asset)

2.19 Foreign Currency Transaction

Transactions in foreign currencies are initially recognised using the exchange rate prevailing at the transaction date. Monetary assets and liabilities denominated in foreign

currencies outstanding at the end of the reporting period are translated at the exchange rates prevailing as at the end of reporting period. Exchange differences arising on the settlement of monetary assets and liabilities or on translating monetary assets and liabilities at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognised in statement of profit and loss in the period in which they arise.

Non-monetary items denominated in foreign currency are valued at the exchange rates prevailing on the date of transactions.

2.20 Stripping Activity

The process of removing overburden to access coal is referred to as stripping. Stripping is necessary to obtain access to coal and occurs throughout the life of an opencast mine. Stripping costs during development and production phases are classified as other mining infrastructure in property, plant, and equipment. Stripping costs are accounted for separately for individual mines.

The company's accounts for stripping activities as follows:

Stripping costs during the Development phase:

These are initial overburden removal costs incurred to obtain access to coal to be extracted. These costs are capitalised when it is probable that future economic benefits will flow to the Group and costs can be measured reliably. Once the production phase begins, capitalised development stripping costs are amortised over the mine life.

Stripping costs during the production phase:

These are overburden removal costs incurred after the mine has been brought to revenue as per the policy of the group. Stripping costs during the production phase can give rise to two benefits, the extraction of coal in the current period and improved access to coal which will be extracted in future periods. Stripping costs during the production phase are allocated between the inventory produced and the stripping activity asset using a standard strip ratio (overburden-to-coal). The standard strip ratio is the total volume of overburden expected to be removed over the life of the mine against the total coal to be extracted over the life of the mine. When the actual volume of overburden removed is greater than the expected volume of overburden removal, the stripping cost for excess overburden removed over the expected overburden removal is capitalised to the stripping activity asset. The stripping activity asset is amortised over the expected useful life of the mine. Changes in geo-mining conditions may have an impact on the standard strip ratio. Changes to the ratio are accounted for prospectively. Stripping activity asset are shown separately under Property, plant, and equipment.

Stripping activity asset for stripping costs during the production phase is recognised in the mines with a rated capacity of one million tonnes per annum and above.

The stripping activity accounting is not applied in Mine Developer and Operator (MDO) arrangements structured as a revenue-sharing arrangement.

2.21 Inventories

2.21.1 Stock of Coal

Inventories of coal/coke are stated at lower of cost and net realisable value. The cost of inventories are calculated using the Weighted Average method. Net realisable value represents the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale.

Book stock of coal is considered in the accounts where the variance between book stock and measured stock is up to +/- 5% and in cases where the variance is beyond +/- 5% the measured stock is considered. Coke is considered as a part of the stock of coal.

Slurry (coking/semi-coking), middling of washeries, and by products are valued at net realisable value and considered as a part of the stock of coal.

2.21.2 Stores, Spares, and Other Inventories

The Stock of stores and spares including other inventories are valued at cost calculated on the basis of the weighted average method.

Provisions are made at the rate of 100% for unserviceable, damaged and obsolete stores and spares and at the rate of 50% for stores & spares not moved for 5 years.

2.22 Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. Where the time value of money is material, provisions are stated at the present value of the expenditure expected to settle the obligation.

All provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future uncertain events not wholly within the control of the Group, are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

Contingent assets are possible assets that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. Contingent assets are disclosed in the financial statements when inflow of economic benefits is probable on the basis of the judgment of management. These are assessed continually to ensure that developments are appropriately reflected in the financial statements.

2.23 Earnings per share

Basic earnings per share are calculated by dividing the profit or loss attributable to ordinary equity holders of the parent entity (the numerator) by the weighted average number of ordinary shares outstanding (the denominator) during the period. Diluted earnings per shares is calculated by dividing adjusted profit or loss attributable to ordinary equity holders of the parent entity (the numerator) by the weighted average number of ordinary shares considered for deriving basic earnings per shares and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential ordinary shares (the denominator).

2.24 Stripping activity provision (Ratio Variance)

Stripping activity provision was recognized or reversed based on the current ratio of Overburden to Coal as compared to the average Stripping ratio (Standard ratio) of the mine as per the policy followed in earlier years since inception consistently by the company. This accounting method being substantiated and validated by a multitude of authoritative bodies and forums, including income tax authorities, the provision created in earlier years have been continued.

The amount of the provision so carried forward is reversed periodically in systematic manner on extraction of actual volume of overburden being in excess of the expected volume in terms of the mine specific plan as approved on mine to mine basis and disclosed as reversal of stripping activity provision under other operating revenue. Such reversal is specific to the mines at the rate the said provision was originally recognised

2.25 Judgements, Estimates and Assumptions

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgments, and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of financial statements and the amount of revenue and expenses during the reported period. Application of accounting policies involving complex and subjective judgements and the use of assumptions in these financial statements have been disclosed. Accounting estimates could change from period

to period. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and, if material, their effects are disclosed in the notes to the financial statements.

2.25.1 Judgements

In the process of applying the Group's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognised in the financial statements:

2.25.1.1 Formulation of Accounting Policies

Accounting policies are formulated in a manner that results in financial statements containing relevant and reliable information about the transactions, other events and conditions to which they apply. Those policies need not be applied when the effect of applying them is immaterial.

In the absence of an Ind AS that specifically applies to a transaction, other event or condition, management has used its judgment in developing and applying an accounting policy that results in information that is:

- a) relevant to the economic decision-making needs of users and
- b) reliable in that financial statements: and
 - (i) represent faithfully the financial position, financial performance and cash flows of the Group;
 - (ii) reflect the economic substance of transactions, other events and conditions, and not merely the legal form;
 - (iii) are neutral, i.e. free from bias;
 - (iv) are prudent; and
 - (v) are complete in all material respects on a consistent basis

In making the judgment management refers to, and considers the applicability of, the following sources in descending order:

- (a) the requirements in Ind ASs dealing with similar and related issues; and
- (b) the definitions, recognition criteria and measurement concepts for assets, liabilities, income, and expenses in the Framework.

In making the judgment, management considers the most recent pronouncements of the International Accounting Standards Board and in the absence thereof those of the other standard-setting bodies that use a similar conceptual framework to develop accounting standards, other accounting literature, and accepted industry practices, to the extent that these do not conflict with the

Indian accounting Standard and accounting policies and practices as stated in above paragraph.

The Group operates in the mining sector (a sector where the exploration, evaluation, and development production phases are based on the varied topographical and geomining terrain spread over the lease period running over decades and prone to constant changes), the accounting policies whereof have evolved based on specific industry practices supported by research committees and approved by the various regulators owing to its consistent application over the last several decades. In the absence of specific accounting literature, guidance and standards in certain specific areas which are in the process of evolution, the Group continues to strive to develop accounting policies in line with the development of accounting literature and any development therein shall be accounted for prospectively as per the procedure laid down above more, particularly in Ind AS 8.

2.25.1.2 Materiality

Ind AS applies to items which are material. Management uses judgement in deciding whether individual items or groups of item are material in the financial statements. Materiality is judged by reference to the nature or magnitude or both of the items. The deciding factor is whether omitting or misstating or obscuring an information could individually or in combination with other information influence decisions that primary users make on the basis of the financial statements. Management also uses judgement of materiality for determining the compliance requirement of the Ind AS. Further, the Group may also be required to present separately immaterial items when required by law.

With effect from 01.04.2019 Errors/omissions discovered in the current year relating to prior periods are treated as immaterial and adjusted during the current year, if all such errors and omissions in aggregate does not exceed 1% of total revenue from Operation (net of statutory levies) as per the last audited financial statement of the Group.

2.25.1.3 Operating lease

Group has entered into lease agreements. The Group has determined, based on an evaluation of the terms and conditions of the arrangements, such as the lease term not constituting a major part of the economic life of the commercial property and the fair value of the asset, that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases.

2.25.2 Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material

adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the Standalone financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

The estimates, judgements and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

The application of accounting policies that require critical judgements and accounting estimates involving complex and subjective judgements and the use of assumptions in these standalone financial statements have been disclosed here in below:

2.25.2.1 Impairment of non-financial assets

There is an indication of impairment if, the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. Group considers individual mines as separate cash generating units for the purpose of test of impairment. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to other mining infrastructures. The key assumptions used to determine the recoverable amount for the different CGUs, are disclosed and further explained in respective notes.

2.25.2.2 Income Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

2.25.2.3 Defined benefit plans and long term employee benefits

The cost of the defined benefit plan and other post-employment medical benefits and the present value of the obligations are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates.

Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation.

The mortality rate is based on publicly available mortality tables of the country. Those mortality tables tend to change only at interval in response to demographic changes.

2.25.2.4 Intangible asset under development

The Group capitalises intangible asset under development for a project in accordance with the accounting policy. Initial capitalisation of costs is based on management's judgement that technological and economic feasibility is confirmed, usually when a project report is formulated and approved.

2.25.2.5 Provision for Mine Closure, Site Restoration and Decommissioning Obligation

In determining the fair value of the provision for Mine Closure, Site Restoration and Decommissioning Obligation, assumptions and estimates are made in relation to discount rates, the expected cost of site restoration and dismantling and the expected timing of those costs. The Group estimates provision using the DCF method considering life of the project/mine based on

- Estimated cost per hectare as specified in guidelines issued by Ministry of Coal, Government of India
- The discount rate (pre-tax rate) that reflect current market assessments of the time value of money and the risks specific to the liability.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS AS AT 31.03.2026

NOTE 3.1 : PROPERTY , PLANT AND EQUIPMENT (Restated)

(₹ in Crore)

3.1.1 Title deeds of Immovable Properties not held in name of the Company

Description of item of property	Gross carrying value	Title deeds held in the name of	Whether title deed holder is a promoter, director or relative# of promoter*/ director or employee of promoter/director	Property held since which date	Reason for not being held in the name of the company
Other land	2,617.95	NA	NA	-	Land acquired in pursuance to Coal Mines (Nationalisation) Act 1973, does not require title deeds separately for corresponding land. All other title deeds for land acquired are in possession and The company is in process of mutation of the same in favour of the company. Land acquired under Coal Bearing Areas (Acquisition and Development) Act, 1957 and Land Acquisition Act, 1894.

3.1.2 Other Land includes Land acquired under Coal Bearing Areas (Acquisition and Development) Act, 1957, Land Acquisition Act, 1894 and other Acts.

3.1.3 Depreciation is provided based on estimated useful life, reviewed at the end of each year by the empowered committee as referred in Significant Accounting Policy para no. 2.8.

3.1.4 For facilitating evacuation of coal, CIL Board in its 491st Board meeting approved construction of Tori Shivpur Rail Corridor with revised project cost of ₹ 3587.37 Cr. against which ₹ 3524.73 Cr. has been deposited with East Central Railway. EC Railway has spent ₹ 3487.70 Cr. till 31.03.2026 which has been recognised as Rail Line/ Rail Corridor. The Company has received a grant of ₹ 595.82 Cr. till date from CCDAC against the said project which has been shown as Deferred Revenue Income under Note- 10.1 to the Financial Statement.

3.1.5 Depreciation charged during the year includes the depreciation capitalised during the year ₹ 1.98 (Previous year ₹ NIL) for mines in development phase.

3.1.6 Above Property, Plant and Equipment also include right of use assets; refer note 8.2.2.

4.3.1 The Company has used the practical expedient by computing the expected credit loss allowance based on a provision matrix in determining allowance for credit losses of trade receivables. The provision matrix takes into account historical credit loss experience and forward looking information. The expected credit loss allowance is based on ageing of receivables that are due and the rates used in provision matrix.

6.1.1 The Secretary to Government, Revenue, Registration and Land Reforms Department, Government of Jharkhand vide his Letter No. 5/Sa.Bhu (CCL) Ramgarh- 303/2012-519 (5)/Ra. Dated 07/02/2020 to The Chairman, Coal India limited has raised a demand of ₹ 26218.15 crores against 36179.30 acres of Government land under the command area of CCL. The demand comprises of Rent, Cess and Salami as lease bandobasti of land for lease period.

Land is acquired by CCL as per notification issued by Central Government under Section 9(1) of CBA (A&D) Act, 1957 and physical possession is taken under Section 12 of CBA (A&D) Act, 1957 which is free from all encumbrances. Accordingly, CCL didn't agree with the demand raised by state government. However, the company as per the provisions of Section 13(5) in the Coal Bearing Areas (Acquisition and Development) Act, 1957 agrees to pay land compensation at present rural agricultural circle rate against Govt. Land to the Govt. of Jharkhand. Meanwhile, for facilitating smooth running of the operations, CCL has

released an adhoc payment of ₹ 2610.12 Crore under protest.

A meeting was held between Hon'ble Minister of Coal & Hon'ble Chief Minister of Jharkhand on 13.11.2021 at Ranchi, further O.M. dated 24.02.2022, the discussion held on the above matter are appended as below: "the Chief Secretary, GoJ informed that the joint verification report will be finalized in next few days and demand against the govt. land will be made taking Rural Agricultural Rate of land and per acre land compensation shall be 1.52 times the rate of land as full of final settlement.

On this issue GOI committed in-principle to pay the dues as per joint verification report and committed that as the verification report is received, officers of Ministry of Coal and Chief Secretary, Jharkhand will sit together will decide the schedule of payment and handing over of the physical possession of land."

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS AS AT 31.03.2026

Further, TVNL (TenughatVidyut Nigam Limited), the state-owned power generating company, vide letter no. 253/22-23 dated 06.06.2022 and 474 dated 26.03.2025 to the Principal Secretary, Energy Department, Government of Jharkhand, has proposed the matter of book adjustment for dues owed by TVNL to CCL against the land compensation payable by CCL to the State Government. Accordingly, CCL vide letter no. CMD/CCL/TVNL-Dues/C-29/2023/717 dated 04/12/2023 and further, as approved in 25th in between board meeting held on 29.03.2025 accorded its

approval for adjustment of TVNL dues of ₹ 1036.27 Crore and ₹ 1308 Crore respectively towards the Government land compensation to be paid by CCL to GoJ in future, as advance under the protest subject to the joint verification report. Total adhoc payment including book adjustment of TVNL dues stands to ₹ 4954.39 Crore.

6.1.2 The above represents concurrent expenditure recognised as per guidelines from Ministry of Coal, Government of India for preparation of Mine Closure Plan.

6.1.3 For dues from directors - Refer Note 16 - (2)(VII)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS AS AT 31.03.2026

same remained unpaid and unclaimed for a period of seven years from the date of transfer of such dividend to unpaid dividend account.

8.4.2 Pursuant to the order of the Hon'ble High Court of Jabalpur dated 07 January 2026, the Board of Directors of the CIL approved the upgradation of pay scales of executives (up to mid-level) across the Coal India Limited Group, payable with effect from 23.08.2023. A provision of ₹ 268.00 crore has been recognised towards this revision for the period from 23.08.2023 to 31.12.2025. The revised salary structure has been implemented since 01.01.2026 and payment are being disbursed accordingly. Also refer Note no. 13.3.

8.4.3 The Jharkhand Highways Fee (Determination of Rates and Collection) Amendment Rules, 2021, notified vide Gazette Notification dated 26.10.2021, provided that the State Government may introduce a scheme for levy of Composition User Fee (CUF) for use of state roads or mining areas. However, no such scheme has been notified in the Gazette. Subsequently, the Director Mines, Jharkhand, vide letter no. 2089 dated 28.12.2021, directed collection of CUF through the JIMS portal, and the Company accordingly commenced billing and collection

of CUF from customers.

The primary responsibility for payment of CUF was on the transporter. In case of rail mode, coal is transported to railway sidings through hired vehicles and, as per contractual terms, CUF (being in the nature of a tax) is reimbursable to the contractor upon submission of claims. However, no such claims were received during the period.

Further, The levy of CUF was challenged before the Hon'ble Jharkhand High Court. Pending resolution of the matter, the Company had continued to collect CUF from customers and accounted for the same as "Other Financial Liabilities (Current)". The total amount billed towards CUF was ₹1,296.38 crore (PY ₹ 1,115.05 crore).

The Hon'ble High Court in a common judgment dated 24th September 2025 (W.P.(C) No. 1532 of 2022 and similar matters), struck down the 2021 Rules and subsequent amendments, ruling that the levy of CUF was beyond the scope of Section 2 of the Indian Tolls Act, 1851. Subsequent to settlement of the matter, collection of CUF had been discontinued w.e.f. 25.11.2025, in terms of Price Notification No. CCL/HQ/M&S/CUF/2025/2665 dated 25.11.2025.

Accordingly, the company passed on the credit of CUF collected to the concerned customers during FY 2025-2026

Others	-	-	-	-

9.1.2 Stripping activity provision (Ratio Variance):

Stripping activity provision recognized earlier is based on the policy followed consistently since inception. Stripping activity provision (net) was recognized or reversed based on the current ratio of OB to Coal as compared to the average Stripping ratio (Standard ratio) of the mine. This accounting method has been substantiated and validated by a multitude of authoritative bodies and forums, including income tax authorities.

The carrying amount of the stripping activity provision is reversed systematically whenever the situation of reversal arises on extraction of actual volume of overburden over expected volume thereof. Such reversal is specific to mines at the rate the said provision has been recognized.

In the case of a mine, where the stripping activity provision has resulted in an excess volume of overburden over the volume of overburden expected, the corresponding provision as determined with respect to, multiplied by the opening average rate of stripping activity being no longer required has been recognised as reversal of stripping activity provision under other operating revenue in the statement of profit and loss.

Amount of stripping activity provision representing the credit balance of the stripping activity created till

31.03.2022 is reversed and credited to the profit and loss accounts in systematic manner. Accordingly, ₹189.13 crore (including reversal of ₹274.69 crore for the year ended 31st March, 2026) has been written back from the provision, leaving a balance of ₹ 3151.96 crore as on 31st March 2026 to be so adjusted over the years as per the policy followed in this respect (refer note 2.24 of Material accounting policy).

The company has adopted a systematic reversal policy for Stripping Activity Provisions, leaving the requirements of IND AS 37 "Provisions, Contingent Liabilities and Contingent Assets". This approach, however, is consistent with IND AS 1 "Presentation of Financial Statements", considering the nature of the company's business and the objective of financial statements as set out in terms of the Conceptual Framework for Financial Reporting under Indian Accounting Standards. Accordingly, a provision of ₹3,151.96 crore (P.Y. ₹3,426.66 crore) is presented under Non-current Provisions as "Stripping Activity Provision" instead of under Other Equity in the Consolidated Balance Sheet. Consequently, the systematic reversal of this provision with consequent impact on net profit is recognised under Other Operating Revenue at ₹274.69 crore for the year (P.Y. ₹21.11 crore debit) (refer note 12.1.4).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS AS AT 31.03.2026

The details of movement in Stripping Activity Adjustment

Balance at the beginning of the year	3,426.66	3,405.55
Charged/(reversed) during the year	(274.69)	21.11
Balance at the end of the year	3,151.96	3,426.66

9.1.3 Provision for Site Restoration/Mine Closure

The Group's obligation for land reclamation and decommissioning of structures consists of spending at both surface and underground mines in accordance with the guidelines from Ministry of Coal, Government of India. The estimate of obligation for Mine Closure, Site Restoration and Decommissioning based upon detailed calculation and technical assessment of the amount and timing of the future cash spending to perform the required work. Mine Closure expenditure is provided as per approved Mine Closure Plan. The estimates of expenses are escalated for inflation, and then discounted at a discount rate (@8%) that reflects current market assessment of the

time value of money and the risks, so that the amount of provision reflects the present value of the expenditures expected to be required to settle the obligation. The value of the provision is progressively increased over time as the effect of discounting unwinds; creating an expense recognised as financial expenses. In reference to above guidelines for preparation of mine closure plan, an escrow account has been opened. (Refer Note - 4.6). During the year the company has assessed its obligation towards land reclamation and decommissioning as per revised guidelines issued by Ministry of Coal, Government of India vide F. No. CPAM-34011/28/2019-CPAM(E-343762) dated-31.01.2025.

Reconciliation of Reclamation of Land/ Site restoration /Mine Closure :

	As at 31.03.2026	As at 31.03.2025
Site restoration provision at the beginning of the year	1,584.58	1,008.57

Add: Unwinding of Provision charged during the year	117.09	91.20
Less: Withdrawal during the year	107.31	19.36
Site Restoration Provision as at the end of the year	1,765.97	1,584.58

9.1.4 Other Employee Benefits includes provision for Exgratia for non-executive based upon the amount approved for payment for the FY 2024-25 i.e. ₹ 1,03,000/- per employee.

9.1.5 The assumptions made for provisions relating to current period are consistent with those in the

earlier years. The assumptions and estimates used for recognition of such provisions are qualitative in nature and their likelihood could alter in next financial year. It is impracticable for the Group to compute the possible effect of changes in assumptions and estimates used in recognizing these provisions.
